JS Ideal School Management System

Web-Based School ERP - Administration, Teaching & Student Portals

Developed By QUAD CORE

Department of Computer Science and Engineering
IUBAT - International University of Business Agriculture and Technology

Stack: PHP | MySQL | HTML | CSS | XAMPP

1. Getting Started

The JS Ideal School Management System is a web-based ERP application designed to automate and simplify academic and administrative activities. Follow the steps below to launch the application on your local machine.

! Make sure **XAMPP** is installed before proceeding. Both **Apache** and **MySQL** must be running at all times while using the system.

1.1 Starting the Server

1**Open XAMPP Control Panel**

Launch the XAMPP application on your Windows machine.

2**Start Apache**

Click the Start button next to Apache. Wait until it shows a green Running status.

3**Start MySQL**

Click the Start button next to MySQL. Both services must be active before proceeding.

1.2 Opening the Application

1**Open a Web Browser**

Launch any modern web browser (Chrome, Firefox, Edge, etc.).

2**Enter the URL**

Type the following address in the address bar: `http://localhost/js_school`

3**Homepage Loads**

The JS Ideal School Management System homepage will appear. You can now log in or register.

2. User Roles & Login

The system provides three separate portals — Administrator, Teacher, and Student — each with tailored features and access levels.

2.1 Administrator

The administrator logs in using fixed credentials. No registration is required.

Email	admin@jsideal.com
Password	1234

Admin Functions:

- Approve and delete user accounts
- Manage the notice board
- Manage class and exam routines
- Assign user profiles
- Manage the salary system

2.2 Teacher Registration & Login

Teachers must register and await admin approval before they can log in.

1. Click Register on the homepage and select role: Teacher.
2. Enter your Name, Email, and Password, then submit.
3. A popup will confirm: Approval Pending. Wait for admin approval.
4. Once approved, log in to access the Teacher Dashboard.

Teacher Dashboard Features:

- View and manage own profile
- Upload student exam results and auto-calculate GPA
- Take student attendance
- Update student fee records
- View class and exam routines
- View salary information

2.3 Student Registration & Login

Students must register and await admin approval before they can log in.

5. Click Register on the homepage and select role: Student.
6. Enter your Name, Email, and Password, then submit.
7. A popup will confirm: Approval Pending. Wait for admin approval.
8. Once approved, log in to access the Student Dashboard.

Student Dashboard Features:

- View profile
- View class and exam routines
- View exam reports, GPA, and grades
- View fee information
- View the notice board

3. Attendance Management

Teachers record daily attendance through the Teacher Dashboard. The system stores attendance records linked to each student's profile.

3.1 Taking Attendance

1**Open Teacher Dashboard**

Navigate to the Take Attendance section from the Teacher Dashboard menu.

2**Select Attendance Date**

Choose the date for which you are recording attendance.

3**Mark Each Student**

Mark each student as Present or Absent from the student list displayed.

4**Submit Attendance**

Click Submit Attendance. A success popup will confirm the record has been saved.

4. Result Management

Teachers upload student exam results through the Teacher Dashboard. The system automatically calculates GPA and grades based on the submitted marks.

4.1 Uploading Results

1**Open Teacher Dashboard**

Navigate to the result upload section in the Teacher Dashboard.

2**Enter Result Details**

Input the Student ID, Subject, Marks, and Term for each entry.

3**Click Upload Result**

The system automatically calculates and stores the GPA and Grade for the student.

5. Fee Management

Teachers and administrators can manage student fee records. The system automatically tracks paid amounts, due amounts, and payment status.

5.1 Adding Fee Records

1**Enter Student ID**

Identify the student by entering their Student ID.

2**Enter Fee & Paid Amount**

Input the total fee amount and the amount already paid. The system auto-calculates the due amount and status.

3**Save the Record**

Save the fee record. It will be visible to both the student and admin dashboards.

5.2 Updating Fee Records

1**Select Existing Record**

Find and select the student's existing fee record.

2**Add Additional Payment**

Enter the additional payment amount in the update field.

3**Click Update**

The system automatically recalculates the paid amount, due amount, and payment status.

6. Notice Board Management

Only the administrator can publish notices. All notices appear on the public homepage and are visible to all users including students and teachers.

6.1 Adding a Notice

1

Open Admin Dashboard

Log in as admin and navigate to the notice board management panel.

2

Write Notice Message

Compose your announcement in the notice text area.

3

Click Add Notice

The notice will immediately appear on the homepage for all users to see.

7. Troubleshooting

If you encounter issues while using the system, refer to the solutions below.

Problem 1: Database Connection Error

- Ensure MySQL is running in XAMPP.
- Verify the database name is: js_school
- Check the db.php connection file settings.

Problem 2: Login Not Working

- Confirm the account has been approved by the administrator.
- Re-verify your email address and password.
- Check that the database connection is active.

Problem 3: Page Not Found

- Ensure the project folder is located inside: htdocs/js_school
- Restart the Apache server from the XAMPP Control Panel.

Problem 4: Unknown Column Error

- Verify that all required columns exist in your database tables.
- Re-import the updated SQL file if any columns are missing.

Problem 5: Blank Page or Fatal Error

- Check for PHP syntax errors in your source code.
- Verify that all required database tables exist.
- Restart both Apache and MySQL from the XAMPP Control Panel.

8. Technical Reference

8.1 Technologies Used

Technology	Purpose
PHP	Backend Development
MySQL	Database Management
HTML	Structure Design
CSS	User Interface Design
XAMPP	Local Server Environment

8.2 Main Database Tables

Table Name	Purpose
users	Stores user accounts
student_profile	Stores student information
teacher_profile	Stores teacher information
attendance	Stores attendance records
results	Stores exam results
student_fees	Stores fee records
teacher_salary	Stores salary records
notices	Stores notice board data
class_routine	Stores class routines
exam_routine	Stores exam schedules

8.3 System Requirements

Hardware Requirements:

- Processor: Intel Core i3 or higher
- RAM: Minimum 4GB
- Storage: 128 GB SSD (500MB free space)

Software Requirements:

- Windows Operating System
- XAMPP Server
- Modern Web Browser

9. Contact & Support
